Contents

Number 1

N. Jones	1	Editorial
Ü. Lepik	3	Dynamic response of elastic–plastic beams with axial constraints
Ü. Lepik	17	Impulsively loaded fully fixed-ended elastic–plastic beams by Galerkin's method
J. R. Klepaczko	25	An experimental technique for shear testing at high and very high strain rates. The case of a mild steel
P. Tuğcu and K. W. Neale	41	A numerical simulation of impact response of typical metals including strain-rate change tests
Yu Shanbing, Sun Gengchen and Tan Qingming	67	Experimental laws of cratering for hypervelocity impacts of spherical projectiles into thick target
Z. P. Wang, C. Lu and S. R. Yun	79	The influence of inertial effects on dynamic growth of voids in ductile solids under intense dynamic loading
W. Johnson	91	Richard Jack, assistant engineer in the expedition to Guadaloupe 1758/9: facts and hypotheses
Announcements	97	

Number 2

C. K. Youngdahl	101	An approximate method for the dynamic response of strain-hardening clamped beams
R. L. Woodward and B. J. Baxter	119	Ballistic evaluation of ceramics: influence of test conditions
Z. Rosenberg and E. Dekel	125	The relation between the penetration capability of long rods and their length to diameter ratio

J. G. Hetherington and P. F. Lemieux — 131 — The effect of obliquity on the ballistic performance of two component composite armours

J. D. Walker and C. E. Anderson, Jr — 139 — The influence of initial nose shape in eroding penetration

P. A. Caridis, E. Samuelides and P. A. Frieze — 149 — On the dynamic response of ship plating under lateral impact

L. Zhu and D. Faulkner — 165 — Dynamic inelastic behaviour of plates in minor ship collisions

Announcements — 179

Number 3

M. Jamjian, J. L. Sackman and W. Goldsmith — 183 — Response of an infinite plate on a honeycomb foundation to a rigid cylindrical impactor

A. Gilchrist and N. J. Mills — 201 — Modelling of the impact response of motorcycle helmets

M. J. Forrestal, D. Y. Tzou and J. Li — 219 — A counterintuitive region of response for elastic–plastic rings loaded with axisymmetric pressure pulses

M. Langseth and P. K. Larsen — 225 — Dropped objects' plugging capacity of aluminium alloy plates

L. Zhu, D. Faulkner and A. G. Atkins — 243 — The impact of rectangular plates made from strain-rate sensitive materials

F. Hörz, M. Cintala, R. P. Bernhard and T. H. See — 257 — Dimensionally scaled penetration experiments: aluminum targets and glass projectiles 50 μm to 3.2 mm in diameter

M. Irvine — 281 — Dynamic loading on bucketwheel reclaimers

X. D. Wang, T. X. Yu and S. A. Meguid — 297 — On the dynamic analysis of an ideally-plastic softening beam

A. P. Mouritz — 311 — Failure mechanisms of mild steel bolts under different tensile loading rates

Corrigendum — 325

Announcements — 339

Number 4

N. Jones	343	Foreword
V. H. Kenner	345	Introduction
V. H. Kenner	347	Werner Goldsmith—a brief biography
	349	Publications of Werner Goldsmith
	357	Students of Werner Goldsmith
	359	Tributes
W. Johnson	365	The rise and fall of early war rockets
C. H. Yew and P. A. Taylor	385	A thermodynamic theory of dynamic fragmentation
M. J. Forrestal, B. S. Altman, J. D. Cargile and S. J. Hanchak	395	An empirical equation for penetration depth of ogive-nose projectiles into concrete targets
R. L. Woodward, N. M. Burman and B. J. Baxter	407	An experimental and analytical study of the Taylor impact test
E. Wu, J.-C. Yeh and C.-S. Yen	417	Impact on composite laminated plates: an inverse method
W. J. Stronge	435	Planar impact of rough compliant bodies
S. T. Jenq, H.-S. Jing and C. Chung	451	Predicting the ballistic limit for plain woven glass/epoxy composite laminate
G. G. Corbett and S. R. Reid	465	Failure of composite pipes under local loading with a hemispherically-tipped indenter
M. Ravid, S. R. Bodner and I. Holcman	491	Penetration into thick targets—refinement of a 2D dynamic plasticity approach
P. Kosza and M. B. Sayir	501	Failure patterns in the core of sandwich structures under impact loading
J. Dual	519	Generation of longitudinal and bending waves in bars by piezoelectric elements with and without backing material
A. K. Ommaya, L. Thibault and F. A. Bandak	535	Mechanisms of impact head injury

W. N. Hardy, T. B. Khalil and A. I. King 561 Literature review of head injury biomechanics

Number 5

M. Ravid, S. R. Bodner and I. Holcman 587 A two-dimensional analysis of penetration by an eroding projectile

R. L. Woodward, W. A. Gooch, Jr, R. G. O'Donnell, W. J. Perciballi, B. J. Baxter and S. D. Pattie 605 A study of fragmentation in the ballistic impact of ceramics

M. N. Raftenberg 619 Lagrangian hydrocode simulations of rolled-homogeneous-armor plate perforation by a shaped charge jet

D. E. Grady and M. E. Kipp 645 Experimental and computational simulation of the high velocity impact of copper spheres on steel plates

R. R. Franzen, J. D. Walker, D. L. Orphal and C. E. Anderson, Jr 661 An upper limit for the penetration performance of segmented rods with segment-$L/D \leq 1$

L. Wang, K. Labibes, Z. Azari and G. Pluvinage 669 Generalization of split Hopkinson bar technique to use viscoelastic bars

K. Kormi, E. Shaghouei and D. A. Duddell 687 Finite element examination of the dynamic response of clamped beam grillages impacted transversely at their centres by a rigid mass

M. Singh, A. K. Madan and M. S. Bola 699 Particulation of metallic jets under high strain rate

Z. Rosenberg and E. Dekel 711 A critical examination of the modified Bernoulli equation using two-dimensional simulations of long rod penetrators

Announcement 721

Number 6

J. M. Lifshitz and H. Leber 723 Data processing in the split Hopkinson pressure bar tests

C. M. Wu and B. Lundberg 735 Efficiency of percussive drilling of rock with a bent drill rod

A. M. Rajendran	749	Modeling the impact behavior of AD85 ceramic under multiaxial loading
D. J. Henke	769	Transient response of plates to travelling loads with application to slamming damage
L. E. Murr and J. M. Rivas	785	Measuring hypervelocity impact velocity from micrometeoroid crater geometry
P. Drazetic, Y. Ravalard, F. Dacheux and B. Marguet	797	Applying non-direct similitude technique to the dynamic bending collapse of rectangular section tubes
S. A. Nassar, F. F. Saccomanno and J. H. Shortreed	815	Disaggregate analysis of road accident severities
Z. Rosenberg, J. Mironi, A. Cohen and P. Levy	827	On the catastrophic failure of high-pressure vessels by projectile impact
W. Johnson	833	Congreve's *Details of the Rocket System* and the Artillery Museum in *The Rotunda* at Woolwich, London
Announcements	843
